ACADEMIC PROJECTS

BIO 359K: Final Principles of Animal Behavior Research Project - *Client: Dr. Blinda E. McClelland* Fall 2020
Worked in conjunction with three classmates to observe fifty hours of Eastern Fox Squirrel observations using focal sampling
Utilized a paired T-test to establish whether a mean difference exists between agonistic and non-agonistic intraspecies interactions
Found no mean difference between intraspecies interactions observed, resulting in a failure to reject the null hypothesis
Attained acknowledgement from our client as the most acute and thorough analysis of squirrel behavior presented to date

SDS 328M: Final Biostatistics Research Project - *Client: Dr. Nathaniel Woodward* Spring 2019
Collected data from reputable sources and analyzed them using R-studio to determine whether a correlation exists
Determined a direct correlation between total budget of a film and box office performance of a film
Found no evidence of any correlation between critic meta-score and gross domestic product within the United States
Earned recognition as one of the three best research projects based on presentation and intrigue, as voted by peers

LEADERSHIP EXPERIENCE AND ACTIVITIES
